Thinsulate™
INSULATION

-20°C ❄️

Goatskin has high tensile strength and abrasion-resistant properties and is often referred to as nature's strongest leather. With smart styling and design, this drivers-style, goat-grain leather glove is fully lined with a blend of Kevlar® and composite filament fiber, offering ANSI cut-level 4 protection. The brown goatskin hides dirt and is also treated with Oilbloc™. The back of hand and fingers feature impact protection that's comfortably flexible and supremely durable. Inside palms are full goatskin leather with ultra-comfortable gel padding. Our cut-and-sewn liner does much more easily than a seamless knit, thanks to the fine tailoring.

Because of a high strength-to-weight ratio, our Endura® goatskin all-leather drivers are much tougher and more durable than their suppleness leads you to think.

This winter version features an assortment of specially selected and placed Thinsulate™ materials, trapping in extra warmth without a loss of glove dexterity, and gets this glove to -20 °C/-4 °F rating.
