Respiratory Accessories for Construction

Respirator Bags

The jobsite is a messy place and can be damaging to safety equipment that is not stored properly. Respirators can often get scratched, broken, and lost in a construction environment. Looking for a solution to effectively store your respirators on the jobsite? Miller® respirator bags provide durable hygienic protection for storing respirators between use. They are constructed of Millerhyde, a tough open weave nylon that is double laminated with vinyl. Millerhyde is lightweight, yet durable and is easily cleaned. Each bag is also equipped with convenient snap loops to attach to a belt.

Respirator Bags

- Compact half mask respirator bag; velcro closure #6935HS/YL
- Half mask respirator bag – will fit most half mask respirators with cartridges and filters; velcro closure #6833HS/YL
- Full face respirator bag – will fit most full face respirators with cartridges and filters; velcro closure #6850HS/YL
