## From Our Humble Beginning

**IVY Wrought Iron Works** was established in 1929 by an English blacksmith named Albert George Story. Many of his original tools are on display at IVY Classic Industries. Originally the name **IVY** was chosen as it was made up of three letters that were all straight lines. These straight letters could easily be cut into any **IVY** product before the company could afford a steel letter punch. Today **IVY Classic Industries** is still a family-owned-and-operated business continuing the traditions of Mr. Albert George Story.

**IVY Classic** is dedicated to manufacturing a comprehensive, high-quality line of power tool accessories and hand tools for the contracting, industrial and DIY markets. All our tools are subject to strict quality-control procedures to ensure they meet our exacting standards.

## We Set Very High Standards

## We Meet Your Needs

We continually update our package designs to help you effectively promote **IVY Classic** products. We use the latest in packing materials, and our product cards are bar coded and clearly labeled with valuable information to make any job easier.

We are very proud of our complete assortment of display merchandisers throughout the product line. Our merchandisers are carefully arranged to include the best-selling items in an organized, space-saving layout.
