## Professional Centerline Balance 12-Inch Measuring Wheel

# A Well-Balanced Wheel

Center-mounted wheel offers improved accuracy.

Unlike most large measuring wheels, the wheel on the new Lufkin® Centerline Balance 12-inch Professional Measuring Wheel is mounted in line with the handle for better balance and accuracy. The wheel's counter has a gear drive, which is more durable and delivers greater long-term accuracy than belt-drive counters. The counter readout is top-mounted above the wheel, bringing it closer to the user for maximum visibility. The folding handle features a sturdy damage-resistant breakaway joint.

- *Centered wheel for improved balance*
- *Gear drive counter for superior accuracy and durability vs. belt drive designs*
- *High-mount, easy-read counter measures to 9,999 feet 11 inches*
- *Wheel wiper prevents mud build-up for consistent results*
- *Folding handle with sturdy damage-resistant breakaway joint*
- *Heavy-duty counter reset*
