

Wet & Dust Mops

FLOOR CLEANING SYSTEMS

Rubbermaid Commercial Products Complete Floor Cleaning System:

- Helps you clean more efficiently and safely
- Reduces labor-related costs
- Improves your facility's work flow

Smarter Cleaning

QUALITY FROM START TO FINISH

Rubbermaid Commercial Products leads the industry with innovative, best-in-class products. We introduced the first looped end, tailbanded mop more than 37 years ago. We were also the first to spin antimicrobials directly into the mop yarn itself for improved performance and longer product life.

Our best-in-class textile products are backed by state-of-the-art research.

We test and retest to meet our rigorous durability standards. Our products deliver a meaningful durability advantage to our customers.

We produce our own blended yarns, giving us quality control throughout the manufacturing process.

We test-laundry our textile products hundreds of times in commercial-grade machines, proving their superior durability and long product life.

Smarter Wet Mopping

There are several important factors to consider when choosing a wet mop. Use the guidelines on the following pages to choose the best wet mop for your floor care needs.

GENERAL MOPPING

Choose mops with high absorbency, release, and durability. If laundering is available, launderable mops will be the most economical choice. Synthetic, rayon, and blended fiber mops with looped ends and woven tailbands offer the best performance and launderability.

FINISH MOPPING

Look for rayon or synthetic mops for high absorbency and release, and construction features such as tailbands and looped ends for better floor coverage and less streaking.

LAUNDERABILITY

The launderability of a mop is based on the number of commercial washing and drying cycles it can withstand before the construction of the mop is degraded or the performance declines. Synthetic and blended fiber mops have the highest levels of launderability.

SYNTHETIC

RAYON

BLEND

ABSORBENCY

The absorbency of a mop refers to its ability to pick up and hold liquid. Higher levels allow faster floor drying times, leading to greater productivity and worker safety. Rayon and cotton yarns have the highest absorbency.

RAYON

COTTON

BLEND

RELEASE

Release is the ability of a mop to disperse liquid onto the floor or during wringing. Higher levels allow faster and more complete wringing, as well as more efficient application of cleaning solutions on the floor. Rayon and synthetic yarns offer the best release of liquids.

SYNTHETIC

RAYON

BLEND

DURABILITY

The durability of a mop is a measure of how long it will perform before needing to be replaced. Synthetic and blended fiber mops are the most durable.

Mops with **antimicrobial fibers** have greater durability because they inhibit the bacterial growth that causes mop odor and discoloration.

ANTIMICROBIAL

SYNTHETIC

 Standard Launderable: Launder and reuse on average 25-75 times.
 Non-Launderable/Disposable: Laundering not recommended.

MOP CONSTRUCTION FEATURES

WOVEN TAILBANDS
 Holds individual yarns in place for greater floor coverage and improved launderability.

YARN TAILBANDS
 Provides greater floor coverage for more efficient cleaning.

PVC COATED MESH HEADBANDS
 Resists chemicals and prohibits moisture retention so strands dry thoroughly.

WOVEN HEADBANDS
 Allows thorough drying of mop strands for longer product life.

LOCKED POLYESTER THREAD STITCHING
 High quality stitching for better durability and longer product life.

LOOPED ENDS
 Reduces fraying and de-plying for better durability and longer product life.

CUT ENDS
 Economical construction for general purpose mopping. Laundering is not recommended.

5" HEADBAND
 For use with Gripper® clamp style mop handles.

1" HEADBAND
 For use with Invader® side gate style mop handles.

BOLT-ON HEADBAND
 Traditional construction.

WEB FOOT® MOPPING SYSTEM

Web Foot® Wet Mops offer the best performance in the industry for healthcare and general commercial maintenance applications. With the highest quality antimicrobial yarns and construction materials, Web Foot® provides the greatest absorbency, fastest drying, ultimate durability, and like-new launderability to meet your general purpose floor cleaning and finishing applications.

PVC COATED HEADBAND

Prohibits moisture retention and resists chemicals for longer product life.

ANTIMICROBIAL FIBERS

Antimicrobial fibers are spun directly into the mop yarn itself to help inhibit the bacterial growth that causes odors and stains and shortens product life.

WOVEN TAILBAND

Enables full floor coverage with every swipe.

LOOPED ENDS

Provide ultimate durability and launderability.

PREMIUM BLEND

Highest quality yarns offer maximum absorbency and fast drying.

WEB FOOT® SHRINKLESS MOPS

- Pre-laundered 4-ply yarn with balanced cotton and synthetic blend
- Colorfast fibers will not shrink or fade with repeated launderings
- Best for wet mopping

SWINGER LOOP® MOPPING SYSTEM

Swinger Loop® Wet Mops offer high performance and durability for general purpose floor cleaning, stripping, and finishing.

PVC COATED HEADBAND

Prohibits moisture retention and resists chemicals for longer product life.

HIGH QUALITY BLEND

Cotton, rayon, polyester, and acrylic yarns provides high absorbency for efficient cleaning.

WOVEN TAILBAND

Enables full floor coverage with every swipe.

LOOPED ENDS

Provide ultimate durability and like-new launderability.

SWINGER LOOP® SHRINKLESS MOPS

- Balanced 4-ply blend of cotton and synthetic yarns for absorbency and strength
- Pre-laundered and pre-shrunk
- Best for wet mopping and general stripping

MOP ATTRIBUTES GUIDE

Absorption: Higher absorbency provides better floor coverage

Durability: Measurement of product life

Release: Percent of liquid released when wrung out in a wringer

Laundryability: Measurement of shrinkage and durability

UNIVERSAL HEADBAND MOPS

Available only from Rubbermaid Commercial Products, Universal Headband Mops can be used with both side gate and clamp style handles.

UNIQUE DESIGN

Fits both clamp style or side gate handles.

WOVEN HEADBAND

Prohibits moisture retention for longer product life.

ECONOMICAL

Cotton, rayon, and synthetic yarns for absorbency and strength.

LOOPED ENDS

Provide ultimate durability and like-new launderability. (To prolong product life, launder using a Laundry Net; see page 15.)

UNIVERSAL HEADBAND BLUE BLEND MOPS

- Cotton and synthetic blend has twice the absorbency of cotton
- Launderable

CUT-END MOPS

An economical solution for general purpose floor cleaning or one-time use.

MESH HEADBAND

Prohibits moisture retention for longer product life.

GOOD QUALITY

Cotton, rayon, and synthetic fibers provide good absorbency.

LAUNDERING IS NOT RECOMMENDED FOR CUT-END FIBERS.

RECYCLED POST-INDUSTRIAL COTTON

Did you know that producing a pound of cotton can consume up to 1,300 gallons of water, giving cotton one of the highest fresh-water ecological footprints among all crops?¹ Additionally cotton production consumes approximately 25% of the world's insecticides, and more than 10% of the pesticides.²

To help reduce these negative impacts on our environment, Rubbermaid Commercial Products is dedicated to the use of post-industrial cotton in our mops. Gathered straight from the cutting room floor of apparel mills, cotton is not only diverted from the waste stream, but we also reduce energy consumption during the overall acquisition, transport, and manufacturing cycle.

For more information on the ecological footprint of cotton consumption, visit the UNESCO-IHE Institute for Water Education at www.waterfootprint.org.

ADJUSTABLE MOP HANDLE

Designed to help reduce the physical strain of mopping.

- Unique handle grip swivels radially a full 360° in either direction to help reduce wrist strain
- Corrosion-resistant aluminum handle adjusts from 54" to 66" for maximum reach
- User-friendly bent handle minimizes the force and leverage required for smooth mopping
- Available with a clamp style head that accommodates a 5" headband mop or the side gate head that accommodates a 1" headband mop

No.	Description	Dimensions	Color	Pack
H124	Adjustable Mop Handle with Side Gate Head	54"-66" l	0000	12
H224	Adjustable Mop Handle with Clamp Style Head	54"-66" l	0000	12

BOLT-ON WET MOP HANDLE

Combines durable metal head with a quality hardwood handle.

- Threaded-bolt head for quick and easy mop changes
- Helps provide more mop contact with the floor surface

No.	Description	Dimensions	Color	Pack

LAUNDRY NET

Helps protect mops and other cleaning items during laundering.

- Locking closure keeps mops, pads, and cloths secure
- Provides easy organization for multiple cleaning crews
- Prolongs the life of string mops

No.	Description	Dimensions	Color	Pack
U210	Laundry Net, Synthetic Mesh Bag with Locking Closure	36" l x 24" w	White	12

WET MOP HANDLE STYLES

Rubbermaid Commercial Product Wet Mops are designed to work with all wet mop handle styles. Use the following guide to choose the correct wet mop heads for your existing mopping system.

INVADER® SIDE GATE

Use with 1" and Universal Headbands.

GRIPPER® CLAMP

Use with 5" and Universal Headbands.

BOLT-ON

Use with bolt-on mop heads. (All Rubbermaid Wet Mops can be special ordered in this style.)

Smarter Dust Mopping

There are several important factors to consider when choosing a dust mop. Use the guidelines on the following pages to choose the best dust mop for your floor care needs.

GENERAL DUST MOPPING

Choose mops with high dust pick up and durability. If laundering is available, launderable mops will be the most economical choice. Twisted loop mop heads with reinforced stitching and slip-on/slide-off backing offer the best performance and launderability.

LAUNDERABILITY

The launderability of a mop is based on the number of commercial washing and drying cycles it can withstand before the construction of the mop is degraded or the performance declines. Synthetic and blended fiber mops have the highest levels of launderability.

SYNTHETIC

BLEND

DURABILITY

The durability of a mop is a measure of how long it will perform before needing to be replaced. Synthetic and blended fiber mops are the most durable.

Mops with **antimicrobial fibers** have greater durability because they inhibit the bacterial growth that causes mop odor and discoloration.

SYNTHETIC

BLEND

ANTIMICROBIAL

DUST PICK UP

Dust pick up is the ability of a mop to remove dust and dirt from the floor surface. Blended fiber and synthetic mops have the highest degree of dust pick up.

BLEND

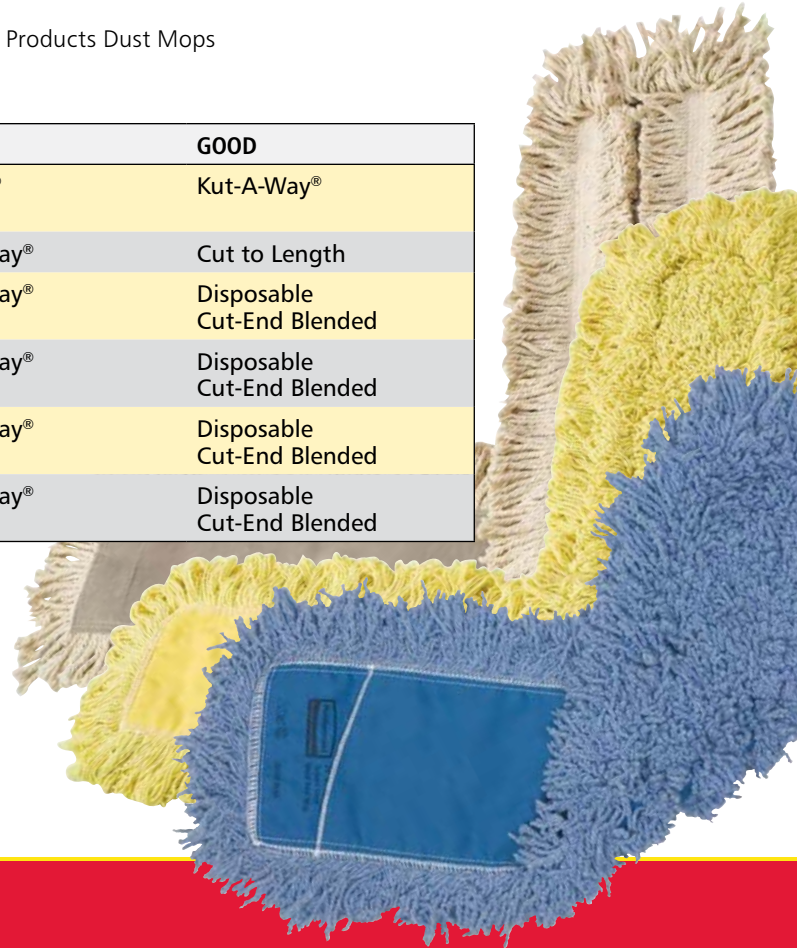

SYNTHETIC

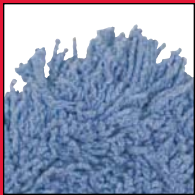

DUST MOP SELECTION GUIDE

Use the following guide to choose the best Rubbermaid Commercial Products Dust Mops for your facility.

ENVIRONMENT	BEST	BETTER	GOOD
HEALTHCARE FACILITIES	Twisted Loop Antimicrobial	Trapper®	Kut-A-Way®
EDUCATIONAL FACILITIES	Twisted Loop	Kut-A-Way®	Cut to Length
INDUSTRIAL & COMMERCIAL	Trapper®	Kut-A-Way®	Disposable Cut-End Blended
FOOD SERVICE	Twisted Loop	Kut-A-Way®	Disposable Cut-End Blended
OFFICE BUILDINGS	Twisted Loop	Kut-A-Way®	Disposable Cut-End Blended
HOSPITALITY	Twisted Loop	Kut-A-Way®	Disposable Cut-End Blended

MOP CONSTRUCTION FEATURES

TWISTED LOOPS

Highly effective at capturing dust and dirt. Premium twisted loops are less prone to snags, frays, and unraveling during cleaning and laundering.

LOOPED ENDS

Reduce fraying and de-plying for better durability and longer product life. More effective than cut-end mops.

CUT ENDS

Economical construction for general purpose dusting.

REINFORCED STITCHING

Reinforced, double-needle stitching at key "wear" points increases product life.

BACKING DESIGN

Slip-on/slide-off backing allows quick, easy setup for standard or breakdown mop frames.

M251

FRAMES & HANDLES

Snap-On Wire Dust Mop Frames and Handles make removal of used dust mops easier and cleaning more efficient.

SLIP-ON BACKING VS. HALF-TIE BACKING

Rubbermaid's slip-on backing decreases setup time and increases product durability. Mops that use half-tie backing are less cost effective than those that use slip-on backing due to damage from torn ties.

TWISTED LOOP DUST MOPS

Twisted Loop Dust Mops are a premium line of pre-laundered dust mops for healthcare and general commercial maintenance applications. They provide maximum durability, optimal cleaning performance, and greater floor coverage.

ANTIMICROBIAL FIBERS

Antimicrobial fibers are spun directly into the mop yarn itself to help inhibit the bacterial growth that causes odors and stains and shortens product life.

TWISTED LOOPS

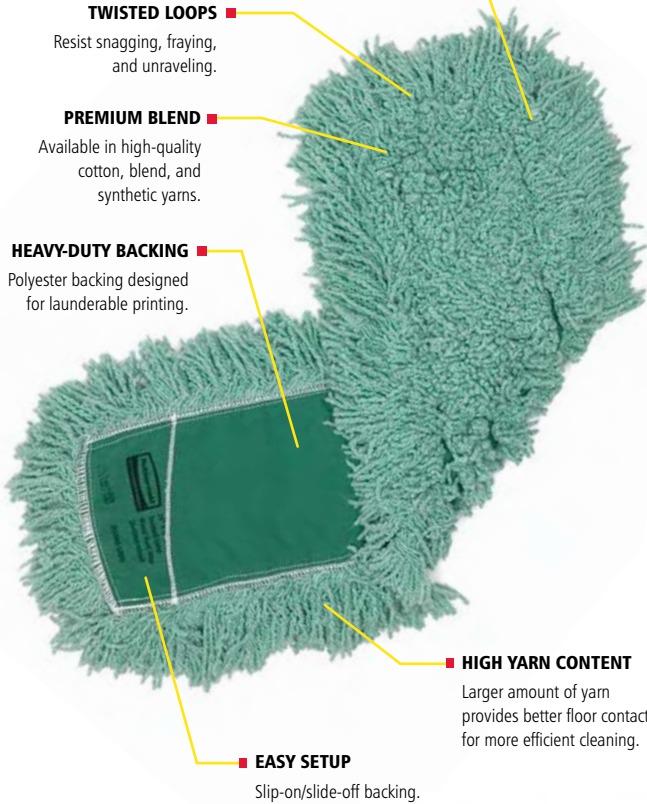

Resist snagging, fraying, and unraveling.

PREMIUM BLEND

Available in high-quality cotton, blend, and synthetic yarns.

HEAVY-DUTY BACKING

Polyester backing designed for launderable printing.

HIGH YARN CONTENT

Larger amount of yarn provides better floor contact for more efficient cleaning.

EASY SETUP

Slip-on/slide-off backing.

TWISTED LOOP ANTIMICROBIAL

- Durable, blended natural and synthetic fibers
- Antimicrobial fibers are spun into the mop yarn to inhibit bacterial growth
- All sewn construction

WaveBrake® Mopping System

WAVEBRAKE® MOPPING COMBOS

The WaveBrake® mop bucket and wringer system reduces splashing for a safer environment, cleaner floors, and improved productivity.

- High-efficiency wringer wrings mop with 18% less effort
- Lasts 58 times longer than comparable wringers*
- Tested to exceed 50,000 wringing cycles; average wringers* perform approximately 860 cycles
- Premium tubular steel and structural web molded plastic
- WaveBrake® buckets work with Rubbermaid Cleaning Carts

*Injection-molded

7780 Dual Water Side Press Combo

DID YOU KNOW?

EVERY YEAR, SLIP, TRIP, AND FALL ACCIDENTS COST U.S. BUSINESSES OVER \$100,000 PER LAWSUIT.

Source: National Floor Safety Institute (NFSI)

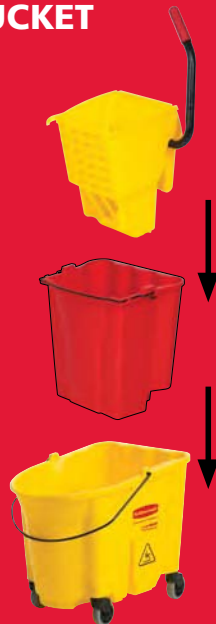

This revolutionary bucket shape with molded-in wave brakes inhibits wave formation, which greatly reduces splashing under typical usage.

Wave reduction continues even when the Dirty Water Bucket is in place.

DIRTY WATER BUCKET

- Separates dirty water from clean water
- Preserves the quality and cleaning power of cleaning solution
- Isolated dirty water reduces risk of cross-contamination
- Helps produce cleaner, less slippery floors
- Divides liquid weight; less lifting power needed when emptying buckets

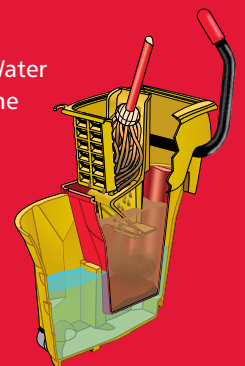

HOW IT WORKS

Traditionally, wringers release dirty water directly back into the bucket's primary cleaning water.

Rubbermaid's Dirty Water Bucket nests below the WaveBrake® Wringer to collect the dirty water and keep it separate from the cleaning solution.

Cleaning Carts & Safety

HIGH CAPACITY CLEANING CARTS

Featuring high capacity storage and superior tool organization. Add our wide range of accessories to create an even more efficient cleaning system.

www.rubbermaidcleaningcarts.com

9T73 Cleaning Cart shown with optional accessories, including WaveBrake® Dual Water Side Press Combo.

9511

MOBILE BARRIER

Easy to use, highly visible mobile barrier for use in many situations.

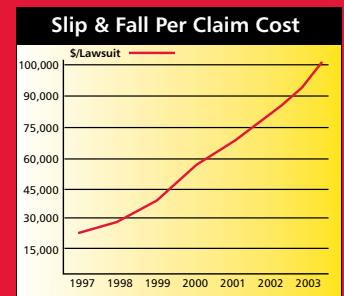

- Flexible panels allow straight, curved, and circular configurations
- Extends to 13' when fully opened; features locking straps keep barrier closed when not in use
- Lightweight and compact (2' x 13" footprint when closed)
- ANSI compliant color and graphics
- For indoor use; shipped assembled

STABLE SAFETY SIGN

Unique "no-tip" design and bold graphics quickly capture pedestrian attention.

- Folds for convenient storage and transport on Cleaning Cart (6173) or Rim Caddy (9W87)
- Large, 13" warning triangle with bold graphics
- Only 1½" thick when closed
- Self-opening feet provide a wide, stable base
- Low center of gravity helps prevent tipping when bumped, kicked, or wind blown

Safety Factoid

Every year, slip, trip, and fall accidents cost U.S. businesses over \$100,000 per lawsuit.
